

# Vacuum Pumping Unit

## General information about ADOR-301VP Vacuum Pumping Unit

The ADOR-301VP vacuum pumping unit for is mainly used to pump out the gas in a container so as to attain high vacuum. It can also be used for vacuum drying. This set fast in startup and pumping, and thus is especially suitable for vacuumization of transformers. Besides, it can also be used for vacuumization in vacuum metallurgy, welding, chemistry, pharmacy, coating and electronic industries.

### Features of Product :

- ✓ Simple configuration and convenient in operation.
- ✓ The fore pump adopts the original vacuum pump imported from Europe, and customer would choose the imported Roots pump or homemade ones according to their purchase capacity. The pumps have high pump speed so that attain high working vacuity.
- ✓ Equip in-line filter could keep large impurities out of equipment and prevent damaging the vacuum pump.
- ✓ The standard model of plants is closed type so that using outside easily and have nice appearance.

## Technical specification of the device:

Parameter	Type Unit	ADOR- 70	ADOR- 150	ADOR- 300	ADOR- 600	ADOR- 1200	
Power Supply		50Hz	380V	3-Phase 4-Wire (or as requested)			
Power	KW	4	6.5	7	11	18.5	
Limit Vacuity	Pa	$\leq 3$					
Pumping Speed	L/S	70	150	300	600	1200	
Pumping Level		2					
Connection Diameter	mm	50			80		
Size	Length	mm	1200	1300	1400	1600	1750
	Width	mm	950	1000	1100	1200	1300
	Height	mm	1500	1600	1700	1900	2100
Weight	Kg	300	400	500	1250	1560
