

Contact Resistance Tester

General information about ADRTM-200 Contact Resistance Tester (Manual)

ADRTM-200 Contact Resistance Tester is designed to measure circuit loop resistance(contact resistance) of high/low voltage switch,power cable and wires,and weld joint.It is also known as Micro-ohmmeter.

Features

- ✓ Small size, light weight, good anti-interference performance
- ✓ high precision, easy operation and perfect protection function
- ✓ Over-current,short circuit,over heat protection.

Technical Specification of the device:

- Input voltage: AC220V \pm 20%,50HZ
- Output current: DC98-200A continuous adjustment
- Test current: DC 100A,200A
- Accuracy:0.5% \pm 1digit
- Resolution: 1 $\mu\Omega$
- Measure range: 0-1999 $\mu\Omega$ (100A); 0-1m Ω (200A)
- Display: Red Nixie tube display
