

Thermal video Borescope

General information about Infrared Thermal video Borescope AD-T2126

- ✓ Infrared probe is bend & replaced.
- ✓ borescope and infrared thermal imaging
- ✓ Exclusive technology & innovative design
- ✓ photo & video
- ✓ Infrared probe can be bent, turned, extended and replaced.
- ✓ Infrared image temperature measurement technology
- ✓ A perfect combination of borescope and infrared thermal imaging technology
- ✓ Exclusive technology and innovative design

Technical specification of the device:

- Temperature measurement
- Indicate and auto track the maximum and minimum temperature in the image.
- DDE Image enhancing technology
- Get clearer images
- 2*2 temperature measurement at the central point
- Palette: iron color, rainbow, grey
- Replaceable insert tube,A great innovation in industrial endoscope
- industry:we use consumable material design of insert tube.
- According to different inspection requirements,users can easily replace the insert tube between white light tube and infrared thermal tube,which can greatly reduce the using cost.
