

Series Police Endoscope

General information about Series Police Endoscope AD-V2133

- ✓ Globally unique replaceable insert tube.
- ✓ Micro probe, 360° all-way articulation.
- ✓ Long distance night vision inspection. Light and portable, only 0.45 KG.
- ✓ Police video borescope is applied to the security departments like public security, armed police, fire fighting, procuratorial organs, customs, etc.
- ✓ It is widely used in criminal investigation, explosive removal, security checking, searching for smuggler, searching and rescuing, and other relevant detection work.
- ✓ It can real-time observe the narrow space and the dark area, take pictures and videos, as well as long-distance transmit the image to provide intuitive image information for the site of criminal investigation and security checking.
- ✓

Technical specification of the device:

- Replaceable Insert Tube:white light probe-night vision probe
- Camera Diameter:Φ6mm
- Camera Pixel:450,000
- Viewing angle:120°-90°
- Depth of Field:10mm~∞/5-15m
- Lighting System
- White light:infrared light
- Bright Control:7 levels manual control
- Bending Control:360° all-way articulation
- Bending Angle:≥150°
- Tube length:1.5meters(customized for different length)
- Tube Material:four layers tungsten-braided tubes
- Display:HD 3.5inch TFT screen
- Host:hand-held design
- Image Lock:current image freezing
- Memory:8G TF card
- Data Port:USB port, TV-out port
- Remote Connection:remote connection with PC
- WIFI (optional):Wifi image transmission, support IOS and Android system,
- real-time image display
- Protection Level:IP57, waterproof, dustproof
- Language:8 languages: Chinese, English, Russian, etc.
- Working Time:≥4.5 hours
- Size:240mm*102mm*126mm

WIFI Parameters

- Wifi Working Mode:AP Mode
- TX Power:14dBm
- Wifi Frequency Range:2.4GHz
- Sensitivity:<-65dBm
- Transmission Speed:54Hz
- RF Power:-2482
- Video Format:AVI
- Connecting Terminals:4 pcs
